

City of Memphis

**Internet Circuits
RFQ # SAIC CoM 2015 –RG R145887**

Answers to Questions

	<u>RFQ Section</u>	Question	Response
1.		On Attachment 1 of the RFP (page 14 of 29), the paragraph following the address for Memphis City Hall appears to have been duplicated following the address for the State of Tennessee at 170 North Main Street. Does the City require two 100 Mbps Internet circuits at <u>each</u> location? If so, does the City require carrier diversity at each location?	Yes, the City requires 2 circuits at each facility. It is preferred to have carrier diversity.
2.		Is there a budget that the City has for these circuits?	Yes.
3.		Who is the current Carrier?	No current carrier.
4.		On page 14 of the RFQ, the City of Memphis is requesting two separate internet connections into EACH the City Hall location and State of Tennessee Location. Does the City want two different carriers for redundancy purposes or does one carrier suffice for all internet connections.	It is preferred to have carrier diversity.
5.		Would the City entertain other solutions to bring more bandwidth potentially to each location via a point to point connection between the two locations...City Hall and State of Tennessee buildings.	Yes, the City will entertain other solutions.
